

RED WHITE AND CLIX
One Community. One Mission.

A shared table. A clear identity.

The complete brand, component and content system. Built for the people who organize, play, volunteer and support.

DESIGN SYSTEM / EDITION 1.0

September 21, 2026

Prepared by BlakSheep Creative

Guidelines · Components · Templates · Tokens

One kit. Every touchpoint.

Use this reference to make every Red White and Clix touchpoint feel related: from a registration card to an impact report, a social carousel to an event poster.

Read and review

Open this HTML offline or use the supplied PDF. Print / Save PDF produces the same US Letter page sequence.

Make and export

Open template-studio.html. Choose a master, edit the text, preview the crop guide and download SVG, PNG or JPG.

Included	What you can use
Brand foundations	Identity, voice, messaging, typography and production rules
45 HTML components	Native reusable markup and shared CSS
224 editable templates	Social, charts, print collateral and presentation slides
Design tokens	CSS, JSON, DTCG-style export, contrast measurements
Source assets	Original logo, licensed fonts and 14 documentary photo references

Working system for review. The supplied identity is established; UI and creative extensions are proposed. Confirmation fields intentionally remain visible where source facts are unresolved.

Find the right layer.

Section	Contents
01 / Brand foundation	Mission, positioning, audiences and brand promise
02 / Logo system	Supplied artwork, clear space, avatar and production gaps
03 / Color and type	Palette, accessible pairings, type hierarchy
04 / Layout and UI	Spacing, grids, buttons, forms, navigation and components
05 / Imagery	Documentary photos, icons and graphic treatments
06 / Voice and messaging	Language, headline bank, CTAs and audience messages
07 / Social and digital	Content families, masters, carousels and banners
08 / Data	22 chart structures, KPI and evidence rules
09 / Print and slides	US Letter applications, contact card and slide masters
10 / Production	Assets, exports, governance and confirmation register
11 / Tokens	CSS values, semantic aliases and implementation handoff

Every component and template has a corresponding editable file in the kit. The PDF is the visual reference; the HTML, SVG and token files are the working source.

Play brings people together.

Mission

Bring people together through well-run tabletop gaming events that create camaraderie, raise awareness and support veteran-focused causes.

Positioning

The veteran-founded tabletop event community for players and supporters who want serious play, genuine connection and a clear way to support veteran causes.

Brand promise

A welcoming seat, a well-run event and an honest account of the mission your participation supports.

Value	What it means in the work
Belonging	Explain the next step; welcome new and returning players.
Play with purpose	Competent events and an understandable mission.
Service without spectacle	Respectful, human imagery and practical language.
Transparent impact	Publish confirmed results with sources and dates.
Camaraderie	Show people participating together as peers.

Design for the next person in.

Audience	Needs	Design response
Competitive players	Format, rules, schedule, fee	Put logistics together; clear registration route.
Veterans and families	Respect and connection	Peer participation; no pity or clinical promises.
New or returning players	A manageable first step	Plain terms, helpful sequence, clear expectations.
Sponsors	Defined benefits and follow-through	Tier details, contact path and sourced results.
Donors and volunteers	Purpose and transparency	Specific next action, allocation and accountability.

Personality

Welcoming · organized · energetic · grounded · practical · respectful.

Focus

HeroClix-centered tabletop events, Indiana roots and a wider Midwest community.

Use RWC after the full name has appeared. Do not imply national programs, military endorsement or additional services that have not been established.

The supplied mark is the authority.

Asset	Status
Primary stacked raster	Supplied PNG · 700 × 700 · transparent PNG
Horizontal / one-color masters	Production specification supplied; artwork not yet commissioned
Simplified icon / favicon	Requires approved small-size design
Avatar	Padded full-logo master supplied; small-size limitations documented

Preserve the complete artwork, including the memorial detail. An SVG containing this PNG is an editable layout, not a vector logo.

Give the mark room.

Clear space

At least 10% of the artwork width on all sides. Keep type, photos and other logos outside this area.

Minimum size

Proposed full-mark minimum: 120 CSS pixels. At 300ppi, the 700px original supports about 2.33 inches at native resolution.

Use	Avoid
Black plate and preserved proportions	Recoloring, stretching, rotation or glow
Entire supplied mark	Rebuilding the wordmark from a typeface
Separate identity and photography	Putting it directly on a busy photograph
New vector artwork after review	Extracting the memorial detail as a pattern

02 / LOGO SYSTEM

An honest avatar system.

Avatar / primary full mark

One supported variant

The primary artwork sits inside a black square with central padding. The circular crop protects the full mark; there is no invented monogram or isolated memorial symbol.

Use the 800px master for upload. Test actual small previews before use.

The current detailed logo loses legibility at 32px and 64px. A simplified icon and favicon remain a separate identity production task. These size previews are tests, not approved small-logo variants.

Identity colors.

logo-red
#FF0000

logo-blue
#0072FF

white
#FFFFFF

black
#000000

Role	HEX	RGB	CMYK %*
logo-red	#FF0000	255, 0, 0	0 / 100 / 100 / 0
logo-blue	#0072FF	0, 114, 255	100 / 55 / 0 / 0
white	#FFFFFF	255, 255, 255	0 / 0 / 0 / 0
black	#000000	0, 0, 0	0 / 0 / 0 / 100

*CMYK is an approximate mathematical conversion, not a press specification. Use the printer’s ICC profile and proof. Bright logo colors remain in the artwork; darker action colors carry normal-size text.

03 / COLOR SYSTEM

Interface colors.

action
#B91C1C

link
#0050B3

ink
#111827

surface
#F5F7FA

border
#D1D5DB

Role	HEX	RGB	CMYK %*
action	#B91C1C	185, 28, 28	0 / 85 / 85 / 27
link	#0050B3	0, 80, 179	100 / 55 / 0 / 30
ink	#111827	17, 24, 39	56 / 38 / 0 / 85
surface	#F5F7FA	245, 247, 250	2 / 1 / 0 / 2
border	#D1D5DB	209, 213, 219	5 / 3 / 0 / 14

*CMYK is an approximate mathematical conversion, not a press specification. Use the printer’s ICC profile and proof. Bright logo colors remain in the artwork; darker action colors carry normal-size text.

Pair color with evidence.

Foreground	Background	Contrast	Normal text
#FFFFFF	#B91C1C	6.47:1	AA pass
#FFFFFF	#0050B3	7.5:1	AA pass
#111827	#FFFFFF	17.74:1	AA pass
#111827	#F5F7FA	16.53:1	AA pass
#FFFFFF	#FF0000	4.0:1	Fails AA
#FFFFFF	#0072FF	4.33:1	Fails AA

Action and links

White on action red. White on action blue.
Blue links on white with underlines. Ink on white or light surfaces.

Status and data

Success/info use blue; error uses red; warning uses ink. Pair each with a written label, icon, symbol or line style.

Recommended composition: 60% white/light, 20% ink/dark, 10% blue and 10% red. This guides balance across a composition; it is not a pixel quota.

Quiet gray borders are for grouping and decoration. Input boundaries use ink so that an essential control is not defined by a faint divider alone.

Bold display. Human details.

Archivo Black

**One Community.
One Mission.**

Space Grotesk

Clear dates. Helpful directions. A welcoming place to play.

Role	Family	Weight	Use
Display	Archivo Black	400	Short headlines and chapter titles
Body	Space Grotesk	400 / 500	Reading copy and supporting content
UI / labels	Space Grotesk	600 / 700	Buttons, controls, metadata and tables

Both families are carried forward from the existing site. Bundled TTF files include their SIL Open Font Licenses and work offline. Do not use either font to reconstruct the logo.

A hierarchy you can repeat.

Role	Desktop	Mobile	Line height
Display / H1	56–72px	36–48px	1.08–1.12
H2	36–48px	28–36px	1.12
H3	24–30px	21–26px	1.2
Body large	20px	18px	1.5–1.6
Body	16–18px	16–18px	1.6
Label / button	14–16px	14–16px	1.3
Caption / source	12–14px	12–14px	1.5

Writing in type

Sentence case. Short display headlines. Left-aligned reading copy. Uppercase only for brief eyebrows. Reading measure: up to 70ch.

Social scale

Typical 1080px canvas: headline 72–76px, body 30–32px, source 22–24px. The editor preserves text wrapping; review if copy length changes.

Slides use larger text at 1920×1080. When content is dense, use more slides or a linked document instead of shrinking the body.

A measured, open grid.

Rule	Value
Spacing	8px main rhythm with 4px half steps
Content width	1200px maximum
Reading column	70ch maximum
Gutters	32px desktop / 16px mobile
Columns	12 desktop / 4 mobile conceptual grid
Section spacing	64px default; 96px for major breaks

Stack columns on small screens. Show event date, venue and registration details before long sponsor sections. Align labels, body copy and action edges.

Shape supports the content.

Cards

White surface · 1px neutral border · 8px radius · 24px internal padding. Default flat; use a subtle shadow only to establish a real layer.

Controls

8px button and input radius. Minimum 44px target. Clear focus outline, a pressed color and an explicit disabled label.

Token	Value
Small shadow	0 2px 8px / ink at 8%
Medium shadow	0 8px 24px / ink at 12%
Large shadow	0 16px 48px / ink at 16%
Motion	120ms fast / 180ms standard
Easing	cubic-bezier(.2, 0, 0, 1)
Reduced motion	No animation or transitions

Hover changes color. Avoid jumpy scale effects, parallax, automatic movement, glass effects and excessive rounding.

Components 01-04.

Button

Primary, secondary, text, hover, pressed, focus and disabled. One main action; 44px minimum target.

Logo

Supplied raster artwork; black plate; preserve proportions and 10% clear space. Full artwork itself at least 120px for production.

Icon

16 original simple line icons. 24px viewBox, 2px stroke; decorative icons hidden from assistive technology.

Badge

Format, registration status and sponsor-tier variants. Meaning is written in words.

Components 05–08.

document

game

Graphic devices

Clean table-grid lines, lightly rounded rectangles and restrained red/blue edge accents. Use a single device per composition.

No camouflage, distressed flags, neon esports effects, metallic gradients or repeating memorial symbols.

Image treatments

Use framed, split or full-width photos with readable captions. Put copy on a solid panel next to the image. Product mockups stay labeled as mockups. Screenshots must come from a real interface.

No new mascot, fictional founder, AI attendee or military-themed illustration system is introduced.

Sound like an organized host.

Welcoming

“There’s a seat at the table for you.” Invite participation without insider tests.

Practical

Lead with what, when, where and how. Explain the format before asking someone to register.

Grounded

Name the source and date. Say what is confirmed and what the organizer still needs to resolve.

Respectful

Treat veterans as people with agency and interests. Show camaraderie without pity or clinical promises.

Use	Avoid
Play, join, community, camaraderie	Partisan slogans and divisive framing
Support, participate, volunteer	“Save veterans” and medical guarantees
Confirmed results with dates	Invented totals, ratings or urgency
Clear beneficiary and allocation	“Every dollar goes directly” without records

06 / MESSAGING

A consistent message bank.

Organizational line

One Community. One Mission.

Core message

Tabletop play creates a place to belong and a practical way to stand with veterans.

Short description

Veteran-founded tabletop events where players compete, connect and support veteran-focused causes—together, at the same table.

Elevator pitch

Red White and Clix brings gamers, veterans, families and supporters together through organized tabletop events. Players get a welcoming, competitive experience. Partners get a practical way to participate in a veteran-focused mission rooted in Indiana.

“Play Together. Stand With Veterans.” is a proposed campaign line, pending brand-guardian approval. The templates default to the current organizational line.

One clear action at a time.

Audience / purpose	Headline	CTA
Player	Bring your best team—and your best sportsmanship.	View event details
Newcomer	New to HeroClix? Start here.	Read the event guide
Community	Camaraderie starts at a shared table.	Join the community
Sponsor	Stand behind a community that shows up.	Become a sponsor
Donor	Know what your gift supports.	Read the impact report
Volunteer	Help make the gathering possible.	Volunteer with RWC
Veteran resources	Looking for support? Start here.	View veteran resources

Registration is the primary event journey. Donation, sponsorship, volunteering and shopping are distinct actions. Keep one dominant action per asset.

Use contractions naturally. Avoid long all-caps text, unexplained jargon and repeated exclamation marks. Emoji are optional and sparse in captions; do not substitute them for information or icons.

07 / SOCIAL AND DIGITAL

One concept, recomposed.

Save the date / square

Save the date / portrait

Save the date / landscape

Save the date / story

Square puts the statement over the details. Portrait adds breathing room. Landscape splits the message and logistics. Story protects the central content from interface overlays.

Every one of the 30 content families has square, portrait, story and landscape masters. Each format has its own layout, not a cropped copy of the first.

07 / SOCIAL CONTENT FAMILIES

Useful updates, calmly delivered.

Operations / Schedule change

Operations / Venue change

Operations / Weather notice

Operations / Cancellation

Additional masters cover registration closing and sold-out status. Countdown variants cover 30, 14, 7 and 3 days, tomorrow and today.

Choose an update only when the status is verified. Every operational template requires a timestamp, authoritative link and contact route. A countdown master is not evidence that the event is nearly full.

Give the idea a clear frame.

Video / New-player welcome

Video / Photo recap

Infographic / Educational checklist

Infographic / Impact statistic

Eight dedicated thumbnail themes cover event announcement, FAQ/format, recap, founder, sponsor, beneficiary, new-player and update videos. Four tall infographic masters cover education, comparison, impact and new-player content.

07 / BANNER SYSTEM

Protect the center.

Banner / wide-banner

Banner / linkedin-cover

Banner / facebook-cover

Banner / youtube-banner

Banner layouts use dedicated central content zones. Guides in the editor are conservative design aids; inspect the real desktop and mobile uploader crops. Legacy LinkedIn and other shared banner masters are also included.

Editable canvas specifications.

Master	Canvas	Safe area (x, y, w, h)
square	1080 × 1080	64, 64, 952, 952
portrait	1080 × 1350	64, 64, 952, 1222
story	1080 × 1920	64, 250, 856, 1350
landscape	1200 × 630	64, 64, 1072, 502
tall	1000 × 1500	64, 64, 872, 1372
widescreen	1920 × 1080	64, 64, 1792, 952
thumbnail	1280 × 720	64, 64, 1152, 592
wide-banner	1500 × 500	345, 70, 900, 325

Canvas and safe-area values are stored in tokens/platform-specifications.json. Most follow the supplied brief as production defaults; they are not guarantees about a platform’s current uploader.

Verified September 21, 2026: [LinkedIn company cover](#) is 1512 × 256. [YouTube banner](#) is 2560 × 1440; the center guide is conservatively scaled from its official minimum-size safe area.

The brief’s 1128 × 191 LinkedIn cover remains as a labeled legacy master. Other channel variants can inherit a shared ratio; check exact upload dimensions and preview before release.

07 / PLATFORM CONFIGURATION

Editable canvas specifications.

Master	Canvas	Safe area (x, y, w, h)
ultrawide	1584 × 396	364, 55, 950, 257
facebook-cover	851 × 315	195, 44, 510, 204
facebook-event	1920 × 1005	64, 64, 1792, 877
facebook-group	1640 × 856	64, 64, 1512, 728
linkedin-cover	1512 × 256	320, 40, 872, 160
linkedin-cover-legacy	1128 × 191	259, 26, 676, 124
youtube-banner	2560 × 1440	508, 509, 1544, 422
avatar	800 × 800	144, 144, 512, 512

Canvas and safe-area values are stored in `tokens/platform-specifications.json`. Most follow the supplied brief as production defaults; they are not guarantees about a platform's current uploader.

Verified September 21, 2026: [LinkedIn company cover](#) is 1512 × 256. [YouTube banner](#) is 2560 × 1440; the center guide is conservatively scaled from its official minimum-size safe area.

The brief's 1128 × 191 LinkedIn cover remains as a labeled legacy master. Other channel variants can inherit a shared ratio; check exact upload dimensions and preview before release.

Start with the content family.

Channel	Shared masters

Instagram, TikTok, LinkedIn, YouTube and other optional templates do not imply RWC owns verified accounts there. Add confirmed account links only when supplied.

08 / DATA AND EVIDENCE

Design the container. Verify the result.

Metric structure

Title → reporting period → value and unit
→ comparison context → source and date.
Each value needs its own provenance.

Chart structure

Use clear axes, direct labels, written legends and non-color distinctions.
Include a table or narrative for complex graphics.

Attendance

[Value]

Funds transferred

[Value]

Source + date: confirm for each metric.

Source: [Organization] · [Report title] · [Date]
[Source URL] · Reporting period: [Period]

The following charts are schematic templates with bracketed fields. Their shapes are illustrative geometry, not sample RWC results. No invented numerical performance data is supplied.

The source SVG can be edited in a vector tool. Populate verified data and recalculate geometry using your reporting or charting tool; these SVGs are not a data-driven dashboard.

Chart structures 01-04.

Data / Vertical bar

Data / Horizontal bar

Data / Grouped bar

Data / Stacked bar

Labels, titles and citation fields remain editable. Do not publish bracketed values or schematic geometry as a reported outcome.

Chart structures 05–08.

Data / 100 percent stacked bar

Chart structures 09–12.

Data / Pie

Data / Donut

Data / Scatter

Data / Bubble

Labels, titles and citation fields remain editable. Do not publish bracketed values or schematic geometry as a reported outcome.

Chart structures 13–16.

Data / Funnel

Data / Waterfall

Data / Gauge

Data / Progress bar

Labels, titles and citation fields remain editable. Do not publish bracketed values or schematic geometry as a reported outcome.

Labels, titles and citation fields remain editable. Do not publish bracketed values or schematic geometry as a reported outcome.

Chart structures 21–22.

Data / Timeline

Data / Comparison matrix

Labels, titles and citation fields remain editable. Do not publish bracketed values or schematic geometry as a reported outcome.

09 / PRINT APPLICATIONS

10 / ASSET LIBRARY

Everything has a place.

Folder / file	Purpose
index.html	Self-contained visual reference, printable offline
template-studio.html	Local text editor with SVG / PNG / JPG export
exports/	Matching PDF and template preview exports
tokens/	CSS layers, JSON, platform config and contrast report
components/	HTML specimens and component inventory
templates/	Social, chart, print and slide SVGs plus inventories
assets/logos/	Original supplied PNG; preserved bytes
assets/fonts/	Bundled TTF files and OFL license texts
assets/photography/	14 original reference photographs and source manifest
assets/icons/	16 editable SVG line icons
guidelines/	Brand rules, source notes and production handoff
tools/	Rebuild and export scripts

The numbered Markdown files mirror the master-brand-kit folder convention: read me, production prompt, guidelines, visual identity, voice, messaging, and context/prices.

From master to finished asset.

Output	Use	Review
SVG	Editable source in a vector editor	Install included fonts if the app ignores embedded font CSS.
PNG	Digital graphics and text-heavy art	Check exact canvas dimensions and actual upload crop.
JPG	Photo-heavy digital assets	Inspect compression and legibility.
PDF	Reference and review	US Letter, background graphics, no browser headers.
Print	Vendor-ready collateral after prepress	Add bleed, check image resolution, convert with printer profile.

The supplied PDF

This is a visual system reference, not a press-certified PDF/X document. Editable print masters are supplied separately. Large printed logos require a faithful vector master.

Source control

Keep the edited SVG with its final export, source facts and approval record. Update the content family and tokens rather than making untracked visual changes across many posts.

Resolve the fact. Keep the field.

Field	Required evidence / decision
Event fee and checkout	Authoritative price, fee basis and registration URL
Schedule and access	Start/check-in times, parking and accessibility details
Beneficiary and allocation	Approved relationship, expenses and transfer terms
Sponsor material	Confirmed tiers, deliverables, availability and logo permission
Impact metrics	Verified record, reporting period and calculation method
Quotes and reviews	Exact source, date, attribution and permission
Photographs	Context, verified date, photographer and usage permission
Merchandise	Current product, price, availability and official store
Brand extensions	Campaign line, new logo masters and simplified icon

Wesley Robertson is the brand guardian; Clint Sanchez / BlakSheep Creative is the agency lead. Review quarterly and before each major event. This kit does not publish a site, send messages or change client accounts.

10 / QUALITY CONTROL

Ready to leave the studio?

- ☐ Original logo, correct proportions and clear space
- ☐ Brand palette and intended type roles
- ☐ One clear message and one primary action
- ☐ Date, venue, fee basis and destination checked
- ☐ All CONFIRM and bracketed fields resolved
- ☐ Sources and reporting dates on factual metrics
- ☐ Photo context, rights and partner permissions checked
- ☐ No invented impact, endorsement, rating or medical claim
- ☐ Desktop, mobile and actual platform crops reviewed
- ☐ Text remains readable at intended display size
- ☐ Font rendering and final export dimensions checked
- ☐ Editable source and final export saved together

The kit remains a working design extension until the brand guardian accepts it. Preserve confirmed identity assets and record changes.

Colors.

CSS variable	Value
--rwc-logo-red	#FF0000
--rwc-logo-blue	#0072FF
--rwc-white	#FFFFFF
--rwc-black	#000000
--rwc-action	#B91C1C
--rwc-link	#0050B3

--rwc-action-pressed	var(--rwc-black)

Source file: tokens/colors.css. The rwc namespace carries existing project tokens forward. Semantic aliases keep UI meaning separate from the original logo hues.

Typography.

CSS variable	Value
--rwc-font-heading	"Archivo Black", Arial, sans-serif
--rwc-font-body	"Space Grotesk", Arial, sans-serif
--rwc-body-size	18px
--rwc-body-leading	1.6
--rwc-h1	clamp(36px,5vw,72px)
--rwc-h2	clamp(28px,4vw,48px)
--rwc-h3	24px
--rwc-label	16px
--rwc-caption	14px
--rwc-display-leading	1.08
--rwc-heading-tracking	-0.025em

Source file: tokens/typography.css. The rwc namespace carries existing project tokens forward. Semantic aliases keep UI meaning separate from the original logo hues.

Spacing.

CSS variable	Value
--rwc-space-1	4px
--rwc-space-2	8px
--rwc-space-3	12px
--rwc-space-4	16px
--rwc-space-6	24px
--rwc-space-8	32px
--rwc-space-12	48px
--rwc-space-16	64px
--rwc-space-24	96px
--rwc-content-width	1200px
--rwc-reading-width	70ch
--rwc-gutter	32px
--rwc-gutter-mobile	16px
--rwc-section	64px
--rwc-target	44px

Source file: tokens/spacing.css. The rwc namespace carries existing project tokens forward. Semantic aliases keep UI meaning separate from the original logo hues.

Effects.

CSS variable	Value
--rwc-radius	8px
--rwc-radius-button	8px
--rwc-radius-card	8px
--rwc-radius-input	8px
--rwc-radius-modal	8px
--rwc-radius-pill	999px
--rwc-shadow-sm	0 2px 8px rgb(17 24 39 / 8%)
--rwc-shadow-md	0 8px 24px rgb(17 24 39 / 12%)
--rwc-shadow-lg	0 16px 48px rgb(17 24 39 / 16%)
--rwc-duration-fast	120ms
--rwc-duration	180ms
--rwc-ease	cubic-bezier(.2,0,0,1)
--rwc-focus-ring	0 0 0 2px #FFFFFF, 0 0 0 5px #0050B3

Source file: tokens/effects.css. The rwc namespace carries existing project tokens forward. Semantic aliases keep UI meaning separate from the original logo hues.

Social.

CSS variable	Value
--rwc-social-margin	64px
--rwc-social-gutter	32px
--rwc-social-headline	72px
--rwc-social-body	32px
--rwc-social-caption	24px
--rwc-social-story-top	250px
--rwc-social-story-bottom	320px
--rwc-social-story-right	160px

Source file: tokens/social.css. The rwc namespace carries existing project tokens forward. Semantic aliases keep UI meaning separate from the original logo hues.

A portable system.

Use the CSS

```
<link rel="stylesheet" href="styles.css">
```

```
<button class="rwc-btn" type="button">
```

```
  View event details
```

```
</button>
```

Change the system

Edit semantic values in tokens/*.css for consumption. For a reproducible full rebuild, update the matching token definitions in tools/build_kit.py and regenerate.

Extend a template

Duplicate the family and supply new content fields. Set canvas dimensions and safe zones in the platform configuration; recompose if the ratio changes.

JSON exports support tooling. DTCG-style output preserves complex CSS expressions as strings; an importer may need to map these. The component HTML has no framework dependency. Forms and buttons are specimens, with no backend services attached.

HTML/SVG layouts stay editable. A raster photo or logo remains a raster asset inside the layout; the surrounding text, panels and geometry remain native elements.

One Community. One Mission.
